

Letter of thanks to our Godmother

Dear Godmother, Mrs. Florence Millet!

The last time we saw each other via zoom on the “Women in Media/Technology Day, we showed you all the work we did during the “Press week”. We all had a good time, and it was wonderful to show you all the research about inspiring women who took a great place in sciences history.

Our teacher showed us the gift you gave us in class. Thank you very for the attention, and your gift gave us the will to do something too about our environment.

According to what our teacher told us, this initiative will take place in the Mount Elgon Region of Uganda of which our trees shall be planted. That’s a great idea to remind us that it is important to protect the forest, because it's the trees that are the base of our society and the source of oxygen.

We all hope that the trees you gave us will grow and become strong to create more life.

My name is Sara, so I'm thrilled to have a tree that wears my name. It would be wonderful!

Thank you again for your amazing gift !

My sincerest salutations, MBIRA Sara 1ère GT2.

Thank you Letter : For The Gift of a Tree

Hi Godmother,

First of all, we wanted to thank you for our trees you are going to plant. With the **global greenhouse effect** the world's going through, this gesture means a lot to us. And for the world. Plus, we're honored, that these trees will have our names, that's pleasant !

So, thanks again, not only for your support towards our education, but because you're following the evolution of not only our trees, but many others, and you're taking care of them.

Oh, and, can you send us some photos or link ? So we can watch them grow ?

Cordially,

Ashley, Bérénice, Karlyne and Owner

Thursday 20th April 2025

Thank you letter

Hello, Mrs Florence Millet, we are so delighted for the moment we spent together via Zoom, it was an amazing experience for us.

We are really grateful for participating in this project, about knowing that women are capable to impact and change the world, that technology can change everything but also we thank you for the gift of starting to grow trees; so we can preserve the Ecosystem and for futur generations.

We look forward to inviting again and hope to that we can learn much more about you and your great work.
