

Article for recycling

Products by Recycling girls

DORA

GOOD MORNING EVERYONE

We are the group A

My name is Dora , and i will introduce our presentation.

Today we are going talk about recycling , first of “**What is recycling ?** “

Recycling is the process of collecting and transforming waste into new products.

The second question “**Why are we recycling ?** “

We recycle to the protect environnement it reduce pollution and save natural resources.

Recycling is important for our future and for the planet. Now our project .

We made decorations using recycled can we cleaned the cans , cut them , and decorated them .

This show that waste can be reused in a creative way.

L’or

I think that reducing waste is more important than recycling.

Anne

No recycling is essential because it allows waste to have a second life .

L'or

Reducing waste is more effective because it avoids creating waste at all.

Anne

Recycling helps limit the use of natural resources and reduces pollution.

L'or

If we produce less plastic and less packaging , there will be less trash in nature.

Anne

Without recycling, waste would accumulate even more in nature.

Conclusion

Finally everyone can reduce waste by using reusable bags , bottles , and containers.
