

The 1st object I have put in my time capsule is a pencil because it is something almost everyone uses everyday and it is also something that is very important to me.

The 2nd object(s) I have put in my time capsule are photos. I chose five different ones; one of the stars because I think it is important for people in the future to know that we had knowledge about space; my second photo is of a man and woman because I think it's important for future generations to know what we looked like; my third photo is one of the earth taken from outer space because that photo proved that humans had been to outer space before and that the earth was known as being round; my fourth photo is a photo of nature because I don't think nature will exist in a few hundred years; and my last photo, the world map with cities and countries because the world will surely change in a few generations.

The 3rd object I have put in my time capsule is a sachet of seeds because as I said nature and plants will probably not exist anymore in a few generations...

The 4th object I have put in my time capsule is a torch because it first of all proves that we understood electricity and second of all shows our level of technology.

The 5th object I have put in my time capsule is a clock because it is something most people use all the time. When we decide to meet up, in conversations, almost everything involves time... It also shows that we were conscious of time.

The 6th object(s) I have put in my time capsule are coins because again, this is something we all use every day. In this case, they are Norwegian coins.

The 7th object I have put in my time capsule is a lighter because fire is important; it heats and lights.

The 8th object I have put in my time capsule is a compass because it is very useful and many people use it. Fishermen use it to situate themselves at sea as well as aircrafts.

The 9th object I have put in my time capsule is a notebook with numbers, texts, the alphabet and drawings in it. I think it is important for the future to see it because it is our culture and the language we speak and write and they will probably not have the same language as us now.

The 10th object I have put in my time capsule is a phone because it represents today's level of technology of.
